

Trello vs GitLab

GitLab compared to other tools

FEATURES

Multiple Project Issue Boards

Large companies often have hundreds of different projects, all with different moving parts at the same time. GitLab Enterprise Edition allows for multiple Issue Boards for a single project so you can to plan, organize, and visualize a workflow for a feature or product release. Multiple Issue Boards are particularly useful for large projects with more than one team or in situations where a repository is used to host the code of multiple products.

Create new issues from the Issue Board

With GitLab Issue Boards, you can create issues directly from the board and assign multiple labels allowing them to appear on multiple boards.

Construct Issue Boards around issue labels

An Issue Board is based on its project's label structure, therefore, it applies the same descriptive labels to indicate placement on the board. GitLab issues can appear on multiple issues and they still have meaning without the context of a particular board.

Add multiple issues to the board

From an Issue Board, you can add multiple issues to lists in the board by selecting one or more existing issues.
